

In order to protect yourself, our employees and our patients, and to comply with guidelines from the Centers for Disease Control & Prevention (CDC), please check with your health care provider or your school and provide copies of the following immunization records:

- MMR (measles, mumps, rubella): 2-dose vaccine (after 1968) or positive titer for each
- Varicella: a positive titer or 2-dose vaccine (Varivax) or documentation from health care provider of previous chicken pox (personal statement from student is not acceptable documentation)
- Hepatitis B: positive antibody level (titer), 3-dose vaccine or 2-dose Heplisav-B vaccine
- Tdap (Tetanus, Diphtheria, Pertussis): vaccine received after 18 years of age
- TB: 2 non-reactive PPD (skin) tests performed or a negative T-Spot (blood) test – either must be within the last year. If ever positive for TB, need a recent chest x-ray report and yearly questionnaire regarding symptoms.
- Flu vaccine within the last year (needs to be within current flu season if rotating October through March)
- Covid-19*: 2-dose vaccine (Pfizer or Moderna) or 1-dose vaccine (J&J)

**COVID-19 vaccination may be required depending on the type of experience requested.*
